Team GimmeBreak

Gimmebreak is a small young studio formed by four people and it's based in London operating at the moment virtually. We don't have huge previous experience in gaming industry, however we do have experience in IT field. We are learning really fast and talking to people from industry. Many people are surprised how far we got with development on our game with such a small team.

Ondrej Dobsinsky

From Slovakia, lives in London.

Developer who loves to code and doing day to day tasks for Gimmebreak. He wants to expand it to bigger company and well known studio. He likes creative problem solving of any kind and not afraid of any challenge. He moved to London in 2013 to join Equinity Charter as C# developer.

Miroslav Hornak

From Czech Republic, lives in Prague.

Game designer and artist. Miro excels in creating ideas of games, mechanics and supports those ideas with awesome design. He moved to London in 2013 to create social platform for artists which was one of the WIRED's 100 Hottest European Startups in 2015.

Matthew Handy

From United Kingdom, lives near to London.

Matt is natural business development guy. He has lots of experience with leading large teams creating software for enterprise and banking sector. When he is not at work he spends time with his three kids.

Vlad Galbavy

From Slovakia, lives in London.

Vlad is helping out with marketing and social presence. He attracts lots of people around him with his great charisma and chilled attitude. He possesses great people skills. He is passionate gym guy and he writes books about fitness. His strongest skill is persistence, common sense and out of box thinking.

GetMeBro! is a real-time multiplayer game. Set in a dark and spooky theme, Dodge the blades in the game and run as far as you can while overcoming different obstacles. Danger, adrenaline, psychedelic music and your run to infinity. Everyone trains to dominate so be prepared! Master the map, enter the battle and claim your fame in ranked battles against other players!

Abilities

Before each game players can choose from a variety of special abilities, which allows them to gain speed and agility, protect themselves against their opponents' attacks, or deploy attacks to defeat their opponents – requiring players to strategize and improvise in every single game.
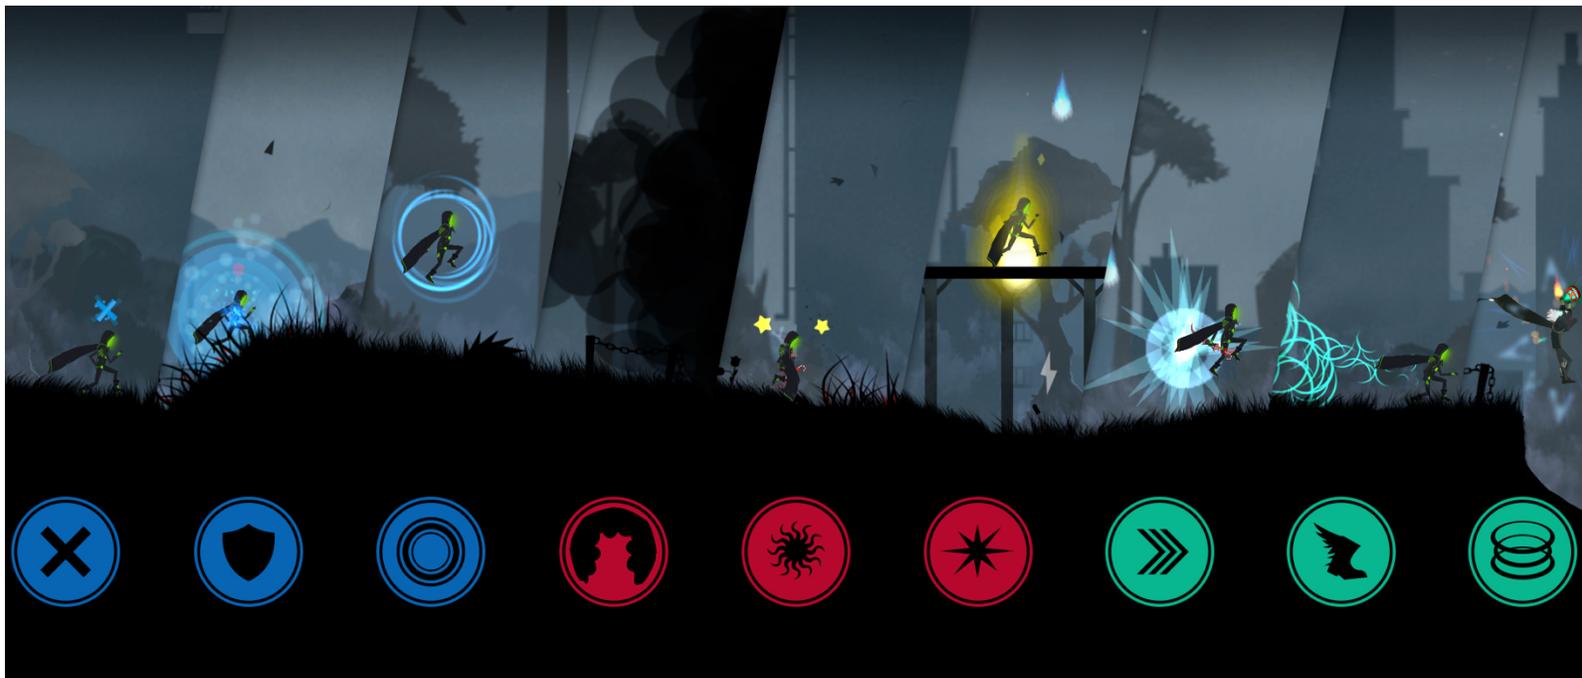

Endless variety

Every month there's a new season. Every week there's a new map. New obstacles and dangerous traps are added regularly so the variety keeps players on their toes all the time!

Every day is player granted with new 3 daily quests to complete and get reward of precious BroCoins. By completing all 3 quest in one day, player gets additional dose of BroCoins to spend in game store.

Game store is full of different cosmetic items from hats to capes. These can be either purchased by in-game currency or received by playing ranked matches.

Stand out from the crowd with your own style. Customize yourself with a wide variety of cosmetic items to create the look you want, and make sure your enemies never forget who you are.

Play with friends and host tournaments

Private matches have no effect on player`s rank but they're fun and create an awesome bond between friends. Other players can watch their friends playing via spectator mode available in private lobby.

This way players themselves can organize home tournaments and watch them on big screen together. This creates an opportunity to stream live matches between players on twitch and host live events and tournaments. For this there is a special tournament mode with ban/pick phase before every match which makes it even more strategic and unique game.
